Phoenix OCR AI Solution for SAP

Next-generation **OCR** and **AI-powered** automation designed for **SAP S/4HANA** environments.

Combining Optical Character Recognition (**OCR**), Artificial Intelligence (**AI**), SAP Business Technology Platform (**BTP**), and **AWS Bedrock** to transform Accounts Payable operations.

Empowering finance teams to work smarter, faster, and more strategically across industries.

Addressing Key Finance Challenges

- Manual invoice processing increases time, cost, and risk of human error.
- Finance teams are overloaded with validation and reconciliation tasks.
- Regulatory compliance and audit consistency remain ongoing challenges.
- Need for a multilingual, scalable, and intelligent SAP-integrated solution.

Introducing Phoenix OCR AI

- AI-enhanced invoice automation that integrates seamlessly with **SAP environments**.
- Powered by **SAP AI Core**, **SAP BTP**, and **AWS Bedrock LLMs** for intelligent document understanding.
- Supports **Arabic** handwriting, **mixed numerals**, and unstructured document types.
- Transforms **Accounts Payable** from manual entry to **intelligent analysis**.

Core Capabilities

Fiori-based UI
for effortless invoice
upload and validation.

Real-time discrepancy
detection with AI
feedback.

Automated 3-way
matching with
SAP FI and MM data.

Mobile dashboards
for approval and
performance visibility.

85% reduction in user
training time through
intuitive design.

SAP AI Core integration ensures enterprise-level **reliability** and **scalability**.

AWS Bedrock provides generative AI for document enrichment and prediction.

Integration with SAP & AWS Ecosystem

SAP BTP enables flexible extensions and analytics capabilities.

Available through **SAP Store** and **AWS Marketplace** for seamless deployment.

Business Impact

Up to 70%
faster invoice
processing and
80% fewer
disputes.

Increased
financial accuracy
and compliance
confidence.

Finance teams
re-focused
on supplier
strategy and
insights.

Substantial ROI
through time and
cost efficiencies.

Customer Spotlight | Finance Transformation

A large enterprise in the energy sector struggled with high invoice volumes and manual validation.

After adopting Phoenix OCR AI Solution integrated with SAP, accuracy reached 98% and processing time was cut by half.

Today, their AP team delivers insights that drive smarter financial decisions.

Innovation Spotlight

- **First-to-market** integration of **AWS Bedrock LLMs** with **SAP AI Core**.
- **Hybrid human-AI** validation enhances confidence and **adaptability**.
- **Generative AI** for predictive pattern **correction** and intelligent **recommendations**.
- **Future-ready** foundation for **finance** automation across **industries**.

Empowering Intelligent Finance Operations

Phoenix OCR AI represents the next step in
SAP finance digital transformation.

Designed for enterprises seeking agility, accuracy, and intelligence in every transaction.

Together with **SAP** and **AWS**, Phoenix is igniting the **future of intelligent automation**.

THANK YOU!
